Slabs - 3cm

Durability/Uses

Interior Walls, Kitchen Counters, Other Counters

Flooring Application

Almost any surfacing requirement can use Vetrazzo. The most popular applications include countertops, vanity tops, tabletops, bar tops, hearths/fireplace surrounds and tub decks.

Vetrazzo has even been used for wall cladding entryways, and shower surrounds. Vetrazzo is a real nature lover, and won't change color from UV exposure like other surfaces that use petrochemical based binding agents.

While it's not warranted for outdoor usage due to the potential of etching from rain with high acid content, current outdoor installations have withstood many freeze/thaw fluctuations in seasonal cycles. Be sure to cover your Vetrazzo when not in use to protect it.

Maintenance

Stone Design recommends using DryTreat Meta Créme penetrating sealer (has no VOC's, so it does not harm the environment). For added protection be sure to wax your top several times a year with Cheng's Concrete Wax to keep it looking as good as the day it was installed.

Notes

Vetrazzo® is a recycled glass surface comprised of 100% recycled glass. When you buy Vetrazzo, you get an exquisite surface material-truly a work of art-that becomes the

centerpiece for your home or project. What else makes it sparkle? A high glass content (85% by volume), expansive color palette, and story in every surface. From architectural to art glass, to beer bottles and jars, each mix is a signature blend of color and life that tells a story about you, too.
