Durability/Uses

Exterior Cladding, Exterior Pavers, Interior Flooring, Interior Walls, Kitchen Counters, Other Counters

Flooring Application

INTENSIFIA® is suitable for a wide variety of applications, including floors, walls, cladding, facades, countertops, patios, driveways, paths, garages, kitchens and entertaining areas.

INTENSIFIA® works on a wide variety of porous surfaces, including all types of natural stone, clay and terracotta tiles and pavers, brick, concrete, polished concrete, terrazzo, terracotta and saltillo.

INTENSIFIA® is suitable for indoor and outdoor applications and for residential and commercial buildings.

Benefits:

Deep color enhancement.

Super oil and water repellency for superior stain protection. ISO 10545-14 Class 5 (best possible resistance to stains), greater than 98% reduction in 24-hour water up-take (Rilem method).

Longer lasting, even outdoors under UV light. *5 year Performance Warranty when INTENSIFIA® is applied by an Accredited Applicator and reasonably maintained as outlined in our warranty document.

Easy to apply. Additional coats can be applied at any time in the future to a cleaned surface. Retains surface hardness and wet slip resistance of porous flooring materials.

Will not flake, yellow, crack, blister or break down in high alkalis and reduces concrete dusting.

Minimizes moss, mold and mildew growth, hides scratches, efflorescence and imperfections.

Breathable: water vapor permeates freely, avoiding moisture build-up inside the material; and is backed by a 5-year warranty.

Maintainance

INTENSIFIA® is a breathable, semi surface / semi impregnating treatment, which enriches and enhances the natural color of porous surfaces as well as providing super oil and water repellency for superior stain protection. Treated indoor and outdoor surfaces are easier to clean and keep looking good for longer.
