Slabs - 3cm

Durability/Uses

Interior Walls, Kitchen Counters, Other Counters, Bathroom Vanities

Flooring Application

Neolith offers a wide variety of size, thickness and finish for its many colors in both slab and tile formats. Not every color is available in every size, thickness or finish for a particular format. When it comes to applications for different finishes, please note that Polished has a slightly more limited set of applications.

Maintainance

Neolith surfaces are extremely resistant to scratching and abrasions and feature incredibly low porosity making it inherently stain resistant. Daily wear and tear are not a long term factor with Neolith and its natural composition lends to its UV resistance and high heat tolerance. Neolith resists harsh chemicals and cleaning agents such as bleach or ammonia but are not needed. For daily cleaning, just wipe away your mess with soap and warm water. Neolith is also NSF Certified safe for food contact giving you further peace of mind.
