Maintainance
Use DryTreat penatrating sealers to seal your stone, and Hannafin cleaners to keep it beautifully maintained. Some stones may benefit from the application of Enhance Plus. Click here to read more about DryTreat Sealers & Cleaners.

Notes
Part of our "Northern Lights" Granite Kit – Our most versatile set of stones are all quarried in North America. These materials are available in both slab and tile form. Slabs are stocked standard in 2cm & 3cm and tile is stocked standard in 12x12 and 18x18. All different finishes are available as well. Slabs and tile can be ordered in polished, honed, suede, flamed, and water jet finishes. The material can also be custom sized with no minimum quantity required, so whether you need a 4" thick slab for a custom residential project, or a 24"x48" tile panel for a large commercial job, these stones are great options. And with only a 2-4 week lead-time, even for custom sizes and finishes, last minute changes or additions to your project can be easily accommodated.
